# Earthitects Studio by Earthitects

4 MINS READ

At Earthitects, we believe the space around us shapes the way we think and feel aligning with our central ethos 'Reverse Urbanisation, a concept of returning back to the nature. Our studio is designed to encourage the seamless flow of ideas and energy, where every element serves a purpose. With a focus on constant innovation, delivering beyond expectations, keen eye to detailing and ultimately being one with nature.

**Project Name:** Earthitects Studio
**Studio Name:** Earthitects
**Location:** 11, Richmond Rd, Shanthala Nagar, Richmond Town, Bengaluru, Karnataka, India
**Completion Year**: 2023
**Floor Area:** 3050 Sq Ft
**Design Team:** Engineers- Sarmas Vali, Sujith Surendran & Muhammad Ajmal
**Architects:** Ar. George E Ramapuram & Ar. Irene Ann Koshy

"Earthitects Studio" design started with a vision to create an environment that pushes the boundaries of physical space and fuels the seamless flow of thoughts and ideas. A brand's workspace serves as its physical embodiment, and the Earthitects workspace perfectly encapsulates its architectural essence of creating & consistently innovating the way we live, a concept that allows us to experience 'living to the fullest'

**Revitalizing Resources: Reimagining Sustainability**

It all started with the idea of reusing the materials that we had in the existing building," says George E Ramapuram. The clearing out of the existing building gave the end of life for various materials such as particle boards, MS frames, and carpets, but it also gave these materials a second life.

Our 3050 square feet space was converted into a sustainable office space using wooden joineries, raw unsized branches for lighting, white concrete for floors, Textured cement plasters for cascading patterns on the wall, faux leather for table upholstery, and flexi ply for wooden ceiling beams. By using all organic materials, we have created an exquisite design that enhances the space's earthy ambience.

In monolithic design, A skirting that seamlessly binds floor and wall, blending harmoniously optimizing space and creating an open and expansive feel while establishing the new standard for office spaces. The corners of the floor and wall are carefully crafted with a skirting that binds the floor and wall together with its form. Standing at the door, one can notice the wall flowing onto the floor, which forms also giving rise to the table with its beautiful curves. The floor has a contrasting, artistic material band of organic shape directing one's eye across the expanse of space. Crafted from natural materials with an emphasis on environmental sustainability, every detail in the workspace is meticulously customized for the user.

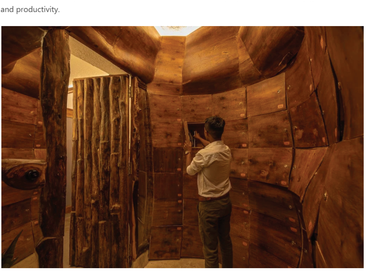

**Earthitects Earth-Zone Reimagined:**

- Sustainability & Innovation Intertwined

An innovative space fosters inventive thinking. While innovation was our major focus, we didn't compromise on creating a sustainable work environment. Our studio is crafted to give life to nature's materials, a harmonious blend of functionality and sustainability, designed to foster innovation and well-being.

- Design Moulded by Values

Our organic workspace is designed to align with our brand values and goals, fostering the fullness of mind, body, and soul. This harmony is achieved through a perfectly balanced relationship between humans and the natural environment.
This contributes to optimal performance, work routines, and employee metrics like engagement, wellness, and productivity.

- Dedicated Detailing

The detailed work and thought process poured into everything have resulted in flawless design and functionality, extending one's comfort zone from the moment one enters the workspace to carry on with their day seamlessly.

- Multifunctional space

The accessibility given to utilize the space at its maximum capability extends the user experience. The transformation of a private cabin for a meeting into an open space for larger gatherings & team brainstorming sessions or research pods creates a space that breathes & transforms with its users.
